The best education systems in the world

1. What is an education system?

An educational system is a structure made up of several components that allow educating the population, more than anything it is aimed at children, youth and adults. places such as schools, universities, academies or kindergarten, among others, are part of this system.

The term education system generally refers to public schooling, not private schooling, and more commonly to kindergarten through high school programs. Schools or school districts are typically the smallest recognized form of “education system” and countries are the largest. States are also considered to have education systems.

Simply put, an education system comprises everything that goes into educating public-school students at the federal, state, or community levels.

2. Background (early education systems)

The oldest teaching methods are found in the ancient East: India, China, Persia, Egypt, as well as in ancient Greece. With the passage of time, educational systems were modified, but their goal was always the same preparation and adaptation to the conditions of life.

In the Ancient World two educational systems can be distinguished: Ancient Oriental and Classical Greek. The former was used in Egypt, the Near East, India and China. In those times the teaching process was focused on learning writing and history.

In the Renaissance period, education was based on the ideas of humanism with a focus on the human being. In the schools of this period they tried to form a harmoniously developed and free person, capable of positively influencing society.

In the industrial era it was the time of active mechanization of production. Therefore, competent people, who knew how to perform the tasks assigned to them in an organized manner, were given priority.

3. What are the current education systems?

The quality of education in some countries that is shown in the statistics makes their educational systems become benchmarks for the rest of the world

there are countries that are the exception. There are some that stand out above the average in terms of the success and level of preparation of their students... Why? The characteristics of their educational systems have taken more into account the fact of the public they are addressing. Motivating the student to whom this training is directed is essential for any type of learning to be more effective.

The countries whose educational systems have become an international benchmark in recent years have made their students stand out are:

Finland

Whenever there is talk of efficient education, Finland is thought of and it is because it has earned on its own merits to be the greatest educational benchmark. Its model is egalitarian and free. The large investment of money that is made in this sector allows us to have all the necessary resources.

Japan

The basis of Japanese education is very important. Legislation for education is stable and permanent, without allowing changes that could alter the contents or procedures of learning.

Effort and constant work are the main thing for this educational system, but students are also educated in values such as respect or preservation of tradition. The development of the problem-solving capacity of the students is also encouraged and great importance is given to the ability to work cooperatively. Academic training and training as people go hand in hand.

Canada

Its education is adapted to the needs of the region and most of its centers are public. Although investment in education is not as important as in Finland, we can say that it is managed very efficiently.

One of the keys to the Canadian system is the importance of diversity in the classroom, even rewarding it financially. It is an educational system that encourages inclusion. In his

case, he opts for continuous evaluation, downplaying the importance of exams, and he is also very committed to the development of social skills and emotional education.

4. What are the countries with the best education systems in the world?

Currently, there are countries that have been constantly developing the educational system so that children from an early age can integrate into society and know how it works properly.

In which are the countries with the best educational system and they are:

- ❖ **Finland.** – where Finnish education is well known throughout the world for its great effectiveness. Students excel in science, reading, and math. And also the teachers are professionals who have a great reputation in society.
- ❖ **South Korea.** – Where his form of education stands out. Where education is compulsory and free from 7 to 15 years. So that the child knows how to integrate and prepare for her future in society.
- ❖ **Japan.** – where Japanese students have extraordinary levels in mathematics, reading, and science. Where education focuses on the aspect of technology and innovation.

It is worth mentioning that there are other countries that have a well-defined and solid educational system for the study of students in which they use various methods or strategies for the improvement of their country. How to be:

- ★ Denmark
- ★ Hong Kong
- ★ Israel
- ★ Sweden
- ★ United States
- ★ Norway
- ★ Singapore

5. CONCLUSION

The formulas for school success are varied and depend on a combination of multiple factors: teacher training, the inclusion of technology in the classroom, emotional support, among many other issues, and all under the auspices of economic investment as a strong bet on the future.

Education in all its modalities is oriented towards the substantive improvement of the quality of teaching and of the procedures for preparing study plans and programs. The application of this supposes, on the one hand, respecting the elements that are common or characteristic of the national culture and the plurality of life options that are expressed in our society and, on the other hand, opening the opportunity to each entity to impart a teaching that is more personally meaningful to the student and of greater social and cultural relevance and pertinence.

The recognition of the freedom, equality and dignity of people imposes the duty to guarantee quality education for all that, without exception, contributes to the development of each man and each woman as free and socially included people.
